

Altyn Plc

("Altyn" or the "Company")

Infrastructure development of the Sekisovskoye underground mine

In line with its continued development drive, Altyn is pleased to announce the purchase and commissioning of the following equipment in Q3 2020:

- Korfmann AL18-2500 ventilator with a capacity of 100 m³/s;
- Lupamat LKV250 compressors, each compressor with a capacity of 45m³/min; and
- CFO flower heaters -100.

With the following equipment in place in Q3 2020, Altyn has commenced constructing the main ventilation unit with a warm air blower heater and compressor unit 6kV O/H line. This will allow the construction of transport declines No. 1 and No. 2 in order to access deeper mine horizons (up to 450 m depth) and therefore maintain the positive momentum in ore production
