

25 May 2020

Altyn Plc
("Altyn" or the "Company")
Drilling rig delivery

Altyn is pleased to announce the delivery of the following equipment at its Sekisovskoye mining operation.

Following the agreement with the official dealer of Epiroc AB in Kazakhstan (a Swedish mining equipment manufacturer), the Company has received its drilling rig “Boomer T1D” with a capacity of 400 metres/month. Further information and pictures showing the equipment purchased are available from <https://www.epiroc.com> and the Company's website www.altyn.uk in the news section.

This equipment will accelerate the horizontal development of the Sekisovskoye deposit as well as the expansion of the underground transport declines, therefore improving access to the mining blocks and maintaining production growth momentum.

Further equipment deliveries are scheduled to arrive in the coming weeks, to include a Boomer T1D LHD long-hole production drill and Diamec U4 Smart exploration drill rig.
